HPLOT : HBOOK Graphics Interface for Histogram Plotting

`HPLOT` is a `FORTRAN`-callable facility for producing `HBOOK` (Y250) output on all kind of graphic devices. The output is of a quality suitable for publications.

Structure:

`SUBROUTINE` subprograms

Usage:

A full description of the system is given in the **HIGZ-HPLOT** Manual (Q120, Y251). The full `HPLOT` facilities are available in the `PAW` (Q121) system.
